

Qiushuang Tian

Software developer

4169 Peralta Blvd, Fremont CA 94536 734-604-6389 qiushuang.tian@gmail.com

Projects

CLOVE: an online market for groceries

Aug 2021

- Develop a MVC application with NodeJS Express deployed on Heroku
- User can post products, rate products and send/receive messages
- Build MySQL database with Sequelize
- Build HTML pages with Handlebars
- Create RESTful API routes and HTML routes for data CRUD with controller
- Use Session Storage to check user authentication
- Use Cloudinary for uploading users' profile pictures

Work Experience

Oracle, Santa Clara, California - Hardware developer

May 2013 - Oct 2016

- Work on verification for cache coherency unit

Pre-silicon verification and Post-silicon

Validation of Siete (SPARC M8)

May 2013 - Oct 2016

- Create test plan for the Coherence & Ordering Unit (COU) interfaces
- Build VMM testbench blocks to verify RTL design of SPARC Core
- Develop and apply stimulus to exercise COU basic operations; Set up and maintain regressions
- Write COU interfaces checker and measure the progress with functional coverage and VCS Coverage Metrics (VCM)
- Inject errors and check the report with Fault Management Architecture (FMA) in post-silicon validation
- Test RAS of Data Analytics Accelerator (DAX) and L3 cache in post-silicon validation

Skills

Web development (HTML/CSS, JavaScript/jQuery), Java, Python, Verilog, System Verilog

Education

University of California, Berkeley, CA

Jun 2021 - Sep 2021

- Coding Boot Camp, Full Stack Web Development

University of Michigan, Ann Arbor, Michigan

Aug 2011 - May 2013

- Master in Electrical Engineering

- Major: VLSI(very large-scale integration)

Harbin Institute of Technology, China

Sep 2007 - Jun 2011

- Bachelor in Electrical Engineering

- Major in Electronics Information Science and Technology
